

AFL's range of sliding enclosures are proudly designed and assembled in Australia.

This range of enclosures cater for a variety of cable types, including loose tube and tight buffered cables. The range has various sizes and panel arrangements available and is perfectly suited for a wide range of applications.

Features and Benefits

- Modular apertures to suit AFL flat or angled panels for various connector types, modes and densities
- Internal fibre clips for managing incoming cables and terminated fibres
- Standard 'M' shaped, angled brackets on the rear of the enclosure allow for efficient management of the cable entering the enclosure
- Double extendable ball bearing slide rails allow for smooth sliding tray mechanism and to provide maximum internal access
- Silkscreen panel locators for ease of fibre identification
- A range of alternate faceplates available for higher density applications

Applications

- Fusion splicing of loose tube or tight buffer cables
- Direct termination of tight buffer cables
- Pre-terminated riser cables
- Low volume through to high-density applications
- AFL SD MTP® Cassettes
