

PRO CABLE TIE 19MM X 25M ROLL BLACK

Part Number: VT19BK/25M

Product Description

CABAC's Pro Hook and Loop Tape is specifically designed to provide Cat6 cable support without disturbing the UTP lay. This makes it ideal for bundling cables behind desks for a neat and tidy finish.

The tape acts as a touch fastener, with hooks on one side that adhere to the loops on the opposite side. Because the product is double sided the fit can be readily adjusted as needed. The product is supplied in reels so it is easy to transport and cut to the required length on site.

There are many benefits to choosing a reusable cable management system in your office or workplace. Hook and pile fasteners can be re-opened to add or remove cables with zero fuss. The material requires little upkeep and maintains its effectiveness over time and throughout multiple uses. This is cost-effective, efficient and reduces waste.

Our Pro Hook and Loop Tape is the perfect solution if you are looking for gentle cable support that won't impair the performance of your Cat6 cabling.

Details

Tape Width: 19mm

Reel Length: 25 metres
