

Panel Mounted Change Over Switch Single Pole 35A

PS35CO

Wiring Instructions

Cable Stripping

To ensure firm clamping of all cables in main terminals, at least 20mm of bared conductor should be used.

Wiring Neon Indicators into Circuits

To provide indication of switch position' provision has been made in these switches for inclusion into the circuits of Neon Indicators. These may be mounted remotely or positioned in the switch itself (during manufacture).

Neon Remote from Switch

For Day/Manual Indication connect Neon between terminal marked N1 and Neutral as shown in diagram.

For Night/Auto Indication connect one neon tail from the rear of switch to terminal N2 and the other to Neutral.

Neon Incorporated in Switch

For Day/Manual Indication insert one Neon tail from rear of switch into the terminal marked N1 and connect the other to Neutral. This may be done via the looping terminal in the switch.
