

Telephony Wall Box

Telecommunications Wall Box

Summary of benefits

- Designed to comply with Telstra Specifications
- Ensures secure access to network equipment, preventing cable service theft.
- Weather resistant

The Madison Technologies range of wall boxes and network termination devices provide a secure termination point for customer lead-in cables to connect to premises distribution cables.

The Madison Technologies Telecommunications Wall Box is specifically designed for external termination of Telstra residential lead-in cables for telephony and is secured with a captive Phillips/flat blade screw.

Wall Boxes must be installed by approved and qualified installers. Contact Telstra for correct installation practices, or refer to Technology Services Branch, C&C Service document CAPA 6/99 Issue 1 or subsequent amendments.

Specifications

Premise Connection Device
