THE CLEAR ADVANTAGE

504 SERIES JUNCTION BOX - CLEARLY BETTER

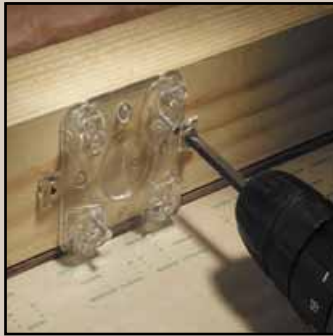

Clipsal has taken traditional junction box design and engineered some remarkable ingenuity to create the new 504 Junction Box.

The first thing you'll notice about the Clipsal 504 Junction Box is that the baseplate is clear. This allows you to inspect the terminations and identify cables without having to remove the cover.

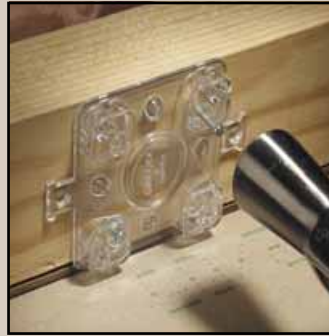

You'll also notice its new low profile design can be installed in tight spaces such as behind drawers, wall cavities and behind appliances.

As with all Clipsal products there are many other clever features you would expect to find such as a clip-on cover that fits securely to the baseplate allowing you a free hand to fit-off the cover screws. This is ideal for when installing overhead.

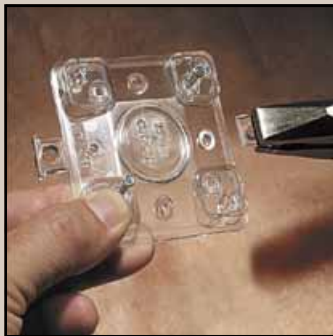

Other features and benefits are listed below:

- External fixing tabs on base provide improved clearance and access to cable connections.

- The baseplate can also be nailed into place.

- For confined spaces, external fixing tabs can be easily removed with pliers.

- Ample knock-outs - these can be snapped off with pliers without tearing the enclosure and allowing cable access in all four directions.

- Supplied with 3 single screw connectors (Bluepoints) and 1 twin screw connector for earthing applications.

- Junction box mounting tabs are suitable for cable-tie applications.
