

Hills

Antenna Brackets Product Range

Hills BC2844BLK Tile Roof & Mast in Black

Hills FB603004 1.0m Curved Fascia Bracket

Hills FB607286 1.8m Heavy Duty Tin Tripod Mount

The Hills range of antenna brackets are suitable for the mounting of digital TV antennas on surfaces such as concrete, tile and tin roofs.

Hills also offers a range of heavy-duty mounts that are beneficial in areas that face issues such as high wind speeds or where large antennas are used and require extra load bearing capacity due to the weight or size of the antenna.

The antenna brackets range has been hot dipped galvanized for superior corrosion protection.

The range is available in either silver or black colours with a galvanised steel finish.

Specifications
