

COPPER LUG TERMINATOR KIT - SMALL

This kit has handyman quantities of copper lugs and links from 2.5 to 16mm² and a tool for crimping (Part No. K26), all packed in a sturdy plastic box (Part No. KPB1).

CABAC copper crimp lugs are made from 99.9%+ cu high conductivity annealed copper which gives the best electrical properties possible. They are capable of withstanding a continuous operating temperature of 155° C, which is well above the temperature properties of most lugs.

It is our recommendation that CABAC copper crimp lugs should be crimped with standard Australian tooling.

FEATURES

- Kit contains handyman quantities totalling 211 pieces of uninsulated Copper lugs and links
- Lugs and links range from 2.5-16mm²
- Copper lug hand crimper tool K26 included
- Supplied with KPB1 plastic, compartment box
- Supplied with KPB1 plastic compartment box
