

Heavy-duty Antenna Nest 11MM-HDN

The HDN is a heavy-duty nest for mounting hardware. HDN can be paired with UB6M/2 or UB8M/2 U-bolts (sold separately) to create a mounting assembly for antennas, masting, etc. The HDN is compatible with pole diameters ranging from 25 to 50mm. It is proudly made in Australia from heavy-duty galvanised steel for long-lasting and durable installations.

Features and Benefits

- » Galvanised finish
- » Heavy-duty construction
- » Used with a U bolt to clamp antenna or masting
- » Design with grip teeth for extra stability to prevent antenna shifting
