# Product Characteristics

Part Number: CBL4BWEW

CABLE BUILDING WIRE EARTH WIRE 4MM 7/085 1C 100M G/Y

Description:

Single core PVC V90 insulated building wire. This cable is commonly used for residential and light to medium commercial installations. Used for switchboard and control panel wiring. Suitable for glanding. Available in all commonly required colours. Uninsulated or Green/Yellow coloured building wire is used where an earth wire is run separately.

Attribute Name	Attribute Value
Outer diameter approx.	4.5 mm
Number of cores	1
Conductor material	Copper
Conductor category	Class 2 = Stranded
Insulation thickness	1 mm
Max. operation temperature	90 °C
Nominal voltage U	0.6 kV
Nominal cross section conductor	4 mm²
Stranding	7/085
Colour outer sheath	Green/Yellow
Material outer sheath	PVC V90
Nominal voltage U0	1 kV

Classifications	
ETIM	EC000057
UNSPSC	26121629
