Product Environmental Profile

LATCH BLK LC1 D09-D65A 42V

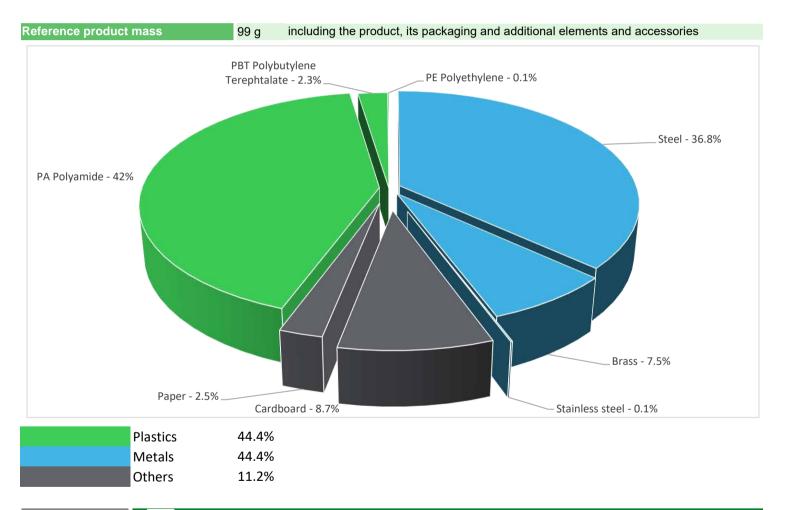

General information

Representative product	LATCH BLK LC1 D09-D65A 42V - LAD6K10E					
Description of the product	The LAD6K10E is mounted on the front face of the contactor. When the contactor coil is switched on, the mobile holder drives the mechanical device of the LAD6K10E which locks the contactor in the closed position, after switching off the power of the contactor coil. The unlocking of the LAD6K10E is done manually or by remote control					
Functional unit	To hold mechanilly the contactor in closed position with contactor coil not powered during a running time between a few minutes and several hours over a period of at least 20 years, control circuit voltage to 42/48 V AC or 42/48 V DC					

Constituent materials

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate - BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as mentioned in the Directive

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page

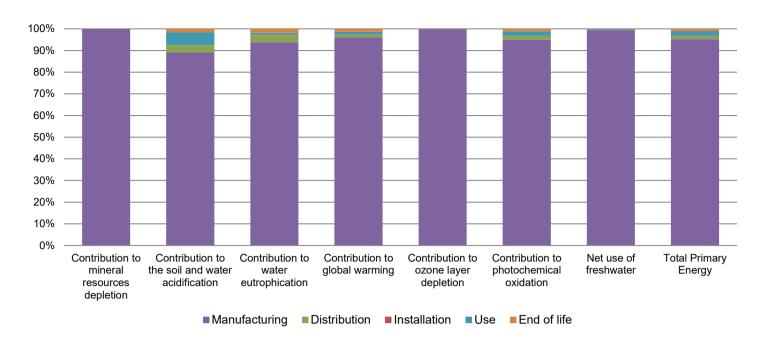

Additional environmental information

	The LATCH BLK LC1 D09-D65A 42V presents the following relevent environmental aspects						
Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified						
	Weight and volume of the packaging optimized, based on the European Union's packaging directive						
Distribution	Packaging weight is 11 g, consisting of Cardboard(78%),Paper(22%)						
	Product distribution optimised by setting up local distribution centres						
Installation	LAD6K10E does not require any installation operations.						
Use	The product does not require special maintenance operations.						
	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials						
	This product contains PBT GF20 FR (17) (1.5g) that should be separated from the stream of waste so as to optimize end-of-life treatment.						
End of life	The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website						
	http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page						
	Recyclability potential: Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).						

Environmental impacts

Reference life time	20 years						
Product category	Other equipments - Passive product - non-continuous operation						
Installation elements	No special components needed						
Use scenario	load rate / rated current (In): 30 % of In percentage of utilization time: 30%						
Geographical representativeness	Europe						
Technological representativeness	The LAD6K10E is mounted on the front face of the contactor. When the contactor coil is switched on, the mobile holder drives the mechanical device of the LAD6K10E which locks the contactor in the closed position, after switching off the power of the contactor coil. The unlocking of the LAD6K10E is done manually or by remote control						
	Manufacturing	Installation	Use	End of life			
Energy model used	Energy model used: France	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU- 27			

Compulsory indicators	LATCH BLK LC1 D09-D65A 42V - LAD6K10E						
Impact indicators	Unit	Total	Manufacturing	Distribution	Installation	Use	End of Life

^{*} represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.8.1, database version 2016-11 in compliance with ISO14044.

The manufacturing phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number ENVPEP2011001_V1 Drafting rules PCR-ed3-EN-2015 04 02
