

Mercury Vapour Standard

The Mercury Vapour Standard range of high pressure mercury lamps utilise Yttrium Vanadate phosphor and provide a neutral white colour temperature of 4000K. The range provides a low cost white lighting solution operating on a simple mercury choke circuit. For replacement purposes only in roads, parks, industrial, rail and dock yard lighting applications.

- Mercury Vapour Standard range of high pressure mercury lamps
- Neutral white colour temperature of 4000K
- Excellent reliability throughout life
