

TECHNICAL SHEET SLEEVE ANCHORS HEXAGONAL NUTS

Benefits :

Full thread system can fit to various fixture thicknesses.
Long body enables use in soft concrete thanks to good repartition of compression load.

Application(s) :

Used in concrete (soft concrete as well) and masonry applications.
Ideal for fastening window frames, partitions, cabinets and more.
A pre-drilled hole, equal to the anchor diameter, is required.

Technical details :

Yellow zinc plated steel.
Head type: hex nut.

Instructions :

Drill a hole into the surface equal to the diameter and the length of the anchor.
Clean the hole.
Insert the bolt through the item and into the hole.
Tighten the nut with the appropriate torque.
