

ASSEMBLED FUSE PANELS FOR PILLAR BOXES

CABAC can supply any Fuse Panel design required. Since designs vary substantially, we stock a few standard undrilled fuse panels from which we are able to manufacture and design that may be required. They have tapered corners that fit into slots on the base to keep the panels secure and are compatible with existing installations. Common panels are injection moulded from Electrical grade thermoplastic material and less common ones are made from resin impregnated fibre board, switch grade board.

FEATURES & BENEFITS

- Thermoplastic panel with tapered edges to engage slots in the pillar base
- A range of popular assemblies available that include fuse holders
- Includes earth neutral bar
- 3 fuse panel is suitable for pillars with short or long lids
- We can supply any design required
