

Globally Better Products

Meeting the needs of Tomorrow Today

CRC 5.56 The Original Toolkit in a can. Penetrates and lubricates, loosens rusted parts, prevents corrosion and displaces moisture. Extremely versatile, containing no silicones, this multi-purpose product has superior penetrating power that breaks through rust and corrosion while it cleans away scale and dirt. Eliminates the need for many disassembly operations. Lubricates for smooth action, and silences annoying squeaks and squeals. Protects metals against corrosion and displaces moisture to help start wet engines.

PENETRATES – CRC 5.56 breaks away rust corrosion, freeing components bonded by dirt and scale, making things work again.

LUBRICATES – CRC 5.56 lubricates where it penetrates, restoring smooth action and silence annoying squeaks and squeals. Parts move freely again.

DISPLACES MOISTURE – CRC 5.56 drives moisture out of all auto electrical and ignition systems making it possible to start wet engines fast.

PREVENTS CORROSION – CRC 5.56 deposits a molecular film on metals to protect against corrosion induced by humidity and other corrosive atmospheres. Can be used in abattoirs and wineries.

(175g #5028, 400g #5005, 1L #5006, 5L #5007, 20L #5009, 200L #5011)

CRC AUTOMOTIVE ELECTRONIC CLEANER is a state of the art cleaner specially formulated for use on today's Hi-Tech Electronic and Computerised vehicles. It is ideal for use in Multi pin connectors, Dash connections, Printed Circuit boards, relays, plugs, switches and fuse assemblies. (350g Aerosol # 5013)

CRC AEROSTART is a unique, special formulation which combines a number of ingredients, each designed to play a vital part in starting engines. It has powerful anti-corrosive and anti-knock qualities. (150g Aerosol #5050, 300g Aerosol #5051, 400g Aerosol #5052)

CRC BRAKLEEN, the original brake parts cleaner – cleans without disassembly. It is formulated to quickly and safely remove brake fluid, grease, oil and other contaminants from brake linings, pads, drums and calipers. (500g #5089, 4 Litre #5089, 20 Litre 5091)

CRC NON-CHLORINATED BRAKLEEN, cleans without disassembly. This brake parts cleaner is formulated to remove all contaminants for linings, brake drums, rotors and disc pads. CRC Non-Chlorinated Brakleen can safely be used in situations where chlorinated solvents may cause a problem. (400g #5084)

CRC CLEAN-R-CARB is a product engineered to maximise carburettor performance and control pollution. CRC Clean-R-Carb is an effective in-place cleaner that removes deposit, gum, varnish, lacquer, resin, paraffin, metallic salts, oil oxides, tar and gasoline stains. Will not harm catalytic converters or oxygen sensors. (400g #5081, 4 Litre #5082)

CRC TAC 2 is an exceptional lubricant, with a tough adhesive quality, which will bond to chain/wear surfaces. It resists cold, hot and salt water wash-off and high temperature sling-off. Ideal for all types of chain drives, car wash equipment, bottling plant, chain rails, sprockets, open gears, snatch blocks, hoists, conveyors, fork lifts, tractors, farm equipment and cement trucks. (300 (340mL) Aerosols #5035)

CRC DISC BRAKE QUITE dampens the vibrations that cause disc brake noise. CRC Disc Brake Quite is an elastomeric polymer product, applied to the back of disc brake shoes to act as a vibration and sound absorbing layer. (118mL Squeeze Pack Code #5016)

CRC GASKET STRIPPER is a formulation especially developed for the easy removal of tough bonded gaskets regardless of age or adhesive resistance. (300g Aerosol Code #5021)

CRC WHITE LITHIUM GREASE A high purity, high quality Grade 2 White Lithium based grease lubricant. It provides long lasting lubrication with excellent water and heat resistance, corrosion protection and film strength. It has both rust and oxidation inhibitors to provide durable lubrication and protection in any weather or temperature. CRC white Lithium Grease reduces friction and wear in metal-to-metal and metal-to-plastic applications and being white in colour allows easy visual film check. Ideal lubricant and protectant for all applications in automotive, workshop/factory and home uses; Brake & Gear Shift Mechanisms, Slide, Conveyors, Guide Rails, Distributor Cams, Water Pumps, Hinges, Latches, Seat Tracks, Garage Door Channels, and Pool Equipment. (300g (443mL) Aerosol #5037)

CRC BATTERY MAINTENANCE is an engineered product for the removal of acid corrosion, deposits, electrolytes, dirt and moisture from battery surfaces. CRC Battery Maintenance penetrates, loosens, and neutralises acid corrosion deposits. It assures maximum battery flow and promotes longer battery life. (300g Aerosol #5097)

CRC BATTERY TERMINAL PROTECTOR is specially designed to protect battery terminals from corrosion which is a major cause of hard starting and battery failure. CRC Battery Terminal Protector prolongs battery life and assures easier starting. Ideal for marine applications as it is highly resistant to salty spray. (300g Aerosol #5098)

CRC AUTOMOTIVE SILICONE is a non-corrosive formula that lubricates, protects and eliminates squeaking and binding caused by friction. CRC Automotive Silicone is clear, odourless and highly resistant to water. Stops sticking. Waterproofs and protects against rust and corrosion. (300g Aerosol #5074)

CRC MANISEAL EXHAUST CEMENT seals off leaks that come from the exhaust system and are drawn into the car by its motion. It seals at the manifold, the manifold flange and gasket, or ends of the muffler. Ideal for industrial use where a seal is required that stand intense heat to 300°C. (142g Tube #5061, 575g Cartridge #5063)

CRC AEROCLEAN DEGREASER delivers a high impact concentrated jet of a unique formulation which combines blended surfactants, detergents and solvents designed to degrease and clean fast. (400g Aerosol #5070)

CRC/STA-LUBE EXTREME PRESSURE ANTI-SEIZE ENGINE ASSEMBLY LUBE Specially formulated for sliding or rotational contact surfaces. It has been specially formulated "for initial start-ups and break-ins". It prevents scuffing, scoring, galling and seizing. It adheres to metal surfaces and remains active over long storage periods preventing rust and corrosion and cushioning close fitting parts. (78g Tube #3333, 284g Tube #3331)

CRC/STA LUBE SYNTHETIC BRAKE CALIPER GREASE contains Molybdenum Disulphide, Graphite and Teflon®. It keeps critical sliding parts in brake callipers free for optimum braking efficiency. Helps to prevent calliper binding, sticking, vibration and squeal and provides for even pad wear. (71g Tube #3301)

CRC 808 SILICONE SPRAY is a concentrated formula that provides a thin, durable, odorless film that revives, lubricates, waterproofs and protects. It will not mark or stain and is ideal for use on all metal, plastic, rubber, fabric, wood and painted surfaces. CRC 808 Silicone Spray lubricates door locks, hinges, linkages, window guides and brushes. CRC 808 Silicone Spray reduces friction and galling even on metal surfaces. Ideal for in-plant conveyors, guides and rails, mould release, rolling and sliding mechanisms. (330g Aerosols #3055.)

CRC DRYGLIDE WITH PTFE A TOTALLY NEW CONCEPT! A dry film lubricating treatment that reduces friction. It is a technically advanced multi-purpose long term dry film lubricant. It will penetrate and bond to metal, wood, rubber, plastic, glass and most other surfaces and form a non-starting micro thin film that prevents sticking, thus reducing friction and wear. Will not freeze, melt or wash off. It seals out moisture and inhibits corrosion and resists oil, dirt and dust build up. 1000's of industrial, domestic and sporting uses. (150g Aerosol #3040)

CRC MARINE 66 Penetrates and loosens scale. Frees "frozen" parts, cleans, lubricates and displaces moisture. CRC Marine 66 is multi-purpose compound that penetrates and loosens scale, frees "frozen" parts and keeps them free, assists cleaning and has a beneficial lubricating effect. It moisture and forms a continued non-hardening molecular film that keeps damaging moisture and salt out. CRC Marine 66 increases life, decreases maintenance, and assures improved performances of all marine inboard and outboard motors. (300g Aerosol #6006, 4 Litre #6008, 20 Litre #6010)

CRC TACKLE GUARD Cleans, lubricates, drives out moisture, prevents corrosion and protects tackle – even though periods of storage. It has been specifically formulated for use on all tackle. A light spray once a day during fishing is recommended. At the end of the season or earlier if heavy use or continuous exposure to the elements occurs, reels should be taken apart, cleaned and lubed, then liberally sprayed with Tackle Guard. It's ideal for protecting and lubricating all types of fresh and salt water reels without damaging monofilament lines, fly fishing lines, EVA grips, seals, varnish etc. CRC Tackle Guard penetrates and drives out moisture leaving a long lasting film that will not dry out. (100g Aerosol #6028)

CRC MINUTE MEND is a fast convenient epoxy repair putty that mixes in just one minute for permanent emergency repairs. It bonds to wet or damp surfaces and can even be applied under water. CRC Minute Mend contains the exact amount of base material and curing agent, eliminating the need for messy mixing cups, measuring or special tools. Simply break off the amount required and knead until there is a uniform colour. Then apply the putty to the area to be repaired. CRC Minute Mend hardens within 20 minutes and can be tapped, sawed, drilled, machined, stained or painted in just 45 minutes.

Fast, convenient, easy to use; Hand-Kneadable – no special tools required; No measuring needed; Reduces waste; Hardens in 20 minutes, cures to full strength in 24 hours; Bonds to damp or wet surfaces and can even be applied under water; After final cure, CRC Minute Mend can be tapped, sawed, drilled, stained or painted; Packaged in a convenient, re-sealable tube. (114g Tube #14070)

CRC HOT SHOT DEGREASER rinses off easily and leaves no residue. A clean engine runs cooler & more efficiently. Use on most surfaces including car and truck motors, chain saw, lawn mowers, boats and farm machinery. (500g Aerosol Code #5073)

CRC DE-SQUEAK prevents brake noise before it occurs. Metallic bonding formula fills grooves and imperfections in friction surfaces that commonly cause squeaks and squeals. Use CRC De-Squeak on new, freshly cut (turned) or existing brake rotors and drums. CRC De-Squeak is safe for use on all types of brake systems, including disc, drum and ABS. Prevents rust and oxidation build up. (300g aerosol #5080)

CRC 5.56 INDUSTRIAL is a high performance variant of CRC 5.56. It is non-flammable and contains PTFE for additional lubricating performance. It is a multi-purpose spray with advanced lubrication that displaces moisture, frees rusted parts and inhibits corrosion. (450g aerosol #5000)

CRC 3-36 prevents rust and corrosion by displacing and sealing out moisture and by forming a continuous protection barrier against water and oxygen. It forms a thin, invisible film that never gets dry or brittle, and penetrates into the finest pores and cracks of the surface. It does not have to be removed before the metal is machined, welded, stamped or otherwise processed. CRC 3-36 protects aluminium (Anodised or Mill) and copper from plaster burn and concrete burn. It prevents “finger printing”, its protective film prevents the corrosion action of the acids and oils left by human handling. It protects magnesium sheet, plate, extrusions and die castings during shipment and storage by forming a thin protective barrier against all atmospheric conditions. (300g Aerosol #3005, 4 Litre #3006, 20 Litre #3009, 200 Litre #3011)

CRC LONG LIFE will give long term protection to all metals subjected to rust and salt corrosion. CRC Long Life is also an excellent lubricant for extending the life of metal-to-metal sliding surfaces. CRC Long life is a clear free running fluid, safe to use in most situations. CRC LONG LIFE preserves engine blocks, pistons and components from atmospheric rusting, ideal for seasonal “mothballing” marine engines. Protects valuable cutting tools and equipment. (300g Aerosol #3097, 4 Litre #3098, 20 Litre #3099)

CRC POWER LUBE WITH TEFLON® is a unique lubricant that incorporates a sophisticated additive package with Teflon® to provide long lasting protection against friction and wear. It outperforms conventional lubricants in lubricating effectiveness, dramatically increasing the life and operating efficiency of parts and equipment. It is able to work longer and better than other lubricants under the extremes of pressure and the environment. (350g Aerosol #3045)

CRC EXTREME DUTY SILICONE LUBRICANT is a premium grade high quality silicone lubricant that exhibits excellent temperature viscosity and lubrication characteristics. This chemically modified silicone actually reacts with a metal surface to provide metal-to-metal lubrication in which the typical silicones fail. (300g Aerosol #3030)

CRC WIRE ROPE AND CABLE LUBRICANT lubricates and protects wire rope to help prevent strand failure, extend working life and eliminate costly downtime. It resists water wash off and high temperature sling off. (285g Aerosol #3055)

CRC BELT GRIP was specially developed to meet the demand for a true industrial, automotive and food grade belt grip. Formulated with synthetic polymer that is non drying, water resistant and chemically stable. CRC Belt Grip extends the life of drive belts by improving traction and allowing runs under reduced belt tension. It creates a non-slip surface that will not attract dust and dirt, it remains pliable and will not glaze or harden. (400g Aerosol #3081)

CRC SOFT SEAL. Its firm, waxy film is highly resistant to humidity and salt spray, never becomes brittle and will not craze. It seals out moisture and corrosive contaminants by forming a dry, transparent, amber film which is highly resistant to humidity, salt water and salt spray and is used for air conditioning equipment, cable end sealer, dies, moulds, jigs, to protect equipment, tooling, in-transit and stored equipment, airport and aircraft maintenance. (300g Aerosol #3013)

CRC HEAVY DUTY SPRAY APPLICATIONS spray and nozzle adjusts from fine mist to pin point stream. Compatible with most light liquids except paints and lacquer thinners. (#4014)

CRC/STA-LUBE GEAR OIL DISPENSING PUMP is made from durable ABS Plastic – tough and reusable. Dispenses 1 fluid ounce of product with each depression. (#4344)

CRC NATURAL DESGREASER is naturally formulated, biodegradable cleaner/degreaser that offers the natural cleaning power of citrus. CRC Natural Degreaser does not require water wash – off, and does not leave sticky residue commonly associated with citrus – based cleaners. CRC Natural Degreaser does not contain any ozone depleting chemicals or chlorinated solvents. The product is a unique and advanced technological blend of natural citrus and organic solvents. It is non – corrosive and suitable for use on all metals. (Aerosol #3076, 4Litre #3077, 20Litre #3078)

CRC XTRA SHINE is a unique, formulated stainless steel cleaner and polish that blends an aqueous power base with a durable metal polish in just one easy step. Using a CRC exclusive ultra shine eliminates dirt, dust, fingerprint and watermarks from stainless steel and leaves behind a non-greasy barrier that resists the return of these stains. Created especially for industrial applications, Xtra Shine is formulated with powerful cleaning agents. Xtra Shine is non – corrosive, biodegradable, non abrasive and perfect for all stainless steel, chrome, aluminium and other shiny metals surfaces. (400g #3090).

CRC PENETR8 is a high-speed penetrant that rapidly frees rusted and corroded fasteners, pins and bound mechanisms. It helps to dissolve rust and corrosion while quickly penetrating. Penetr8 eases disassembly of mechanical equipment, fittings and fixtures through its high speed penetration. CRC Penetr8 is a clear formula that contains no dyes, and leaves no mess. CRC Penetr8 has a convenient 360 degree spray valve, allowing it to be sprayed from any position. The independent Capillary Penetration of Liquids test that was carried out on Penetr8 showed that it penetrates further than any of its competitors, including Yield, WD-40, Penetrene and Inox. (400g aerosol #5501)

CRC LANOSHIELD is non-evaporative, making it the ideal product to withstand harsh outdoor applications such as Agriculture and Farming, Marine, Communications and Timber. As a lubricant CRC Lanoshield is ideally suited to both Light and Heavy Industry in areas such as food production, metal fabrication, saw blades moulding and extrusion and general maintenance. CRC Lanoshield forms a thin film of lanolin, completely sealing surfaces from the elements and all corrosive agents. It produces a smooth even film that clings to metal, repels water and will not wash off. (350g aerosol #3150)

CRC THREAD LUBRICANT is a general purpose lubricant that prevents seizing and galling caused by corrosion. It aids assembly and disassembly, prevents rust and corrosion, and helps reduce costly downtime and breakage. The unique formula has a smooth texture and fine particle sizing, making it an excellent choice for closely fitted parts that need lubrication. (227gm #35925)

CRC SYNTAX SYNTHETIC LUBRICANT is suited for both light and heavy commercial use, as well as around the home and garage. It contains no acid, silicone or petroleum distillates, making it safe for use on rubber, metals, painted surfaces, fibreglass and most hard surfaces. It is ideal for use on engines, marine equipment, office machines, plumbing, hand tools, power tools, hinges, gates locks, fittings and switches. It is recommended for use on all food processing equipment. CRC Syntax is a clean, odourless and clear formula that won't wash off or dry out. It is silicone free which allows treated surfaces to be repainted. It has an extreme temperature range of -40 to +350 degrees C. Also, it has an extremely high Flash Point of 250 degrees C and Fire Point of 300 degrees C. (350gm aerosol #3032)

CRC NAIL GUN CLEANER is a quick drying, non-conductive cleaner and degreaser specially formulated for nail guns and pneumatic tools. It cleans quickly and leaves no residue. It contains no chlorinated solvents, is non-staining and non-corrosive. CRC Nail Gun Cleaner swiftly and effectively degreases, removes oil, dirt, wax and other foreign matter that can cause failures. Down time is minimised by cleaning without disassembly. (400g aerosol #3051)

CRC BRIGHT ZINC. The dried film in Bright Zinc contains 60% pure zinc, needs no primer and is sprayed directly onto bare metal. It is designed to give up to four years protection in moderate outdoor conditions - a moderate to heavy coat, or two fine coats will achieve this . CRC Bright Zinc is designed to give an outstanding decorative finish. Balance this with a high level of corrosion protection and you have an all round professional coating. Ideal for after-weld touch ups. Ideal for use on: Fences, Trailers, Marine, Spouting and Gates. (350g aerosol #2087)

CRC BLACK ZINC. Coloured Zincs are quick drying, primer-less topcoats, reinforced with Zinc complexes for added corrosion control. Will outlast standard decorative paints by resisting undercutting and blistering from corrosion. The zinc content assists adhesion to bare metals. Dries to a deep rich finish. Final finish is both scratch and solvent resistant. Does not require an undercoat. Optimum level of zinc complexes give outstanding protection over bare metal. Unique resin system bonds strongly to most metals. (300g aerosol #2089)

CRC ANTI-CORROSION LIGHT DRY FILM is a superior light, dry film corrosion inhibitor that creeps quickly to cover exposed metal surfaces, drive out moisture and leave an ultra thin film that protects metal against corrosion for up to one year indoors. Anti-Corrosion Light Dry Film is a thin film that repels dust and dirt to keep stored parts and equipment clean, and it will not run or puddle during storage. It is highly effective in humid conditions or after floods. Tools and equipment coated with Anti-Corrosion Light Dry Film can be handled or used without removing the film. (300g aerosol #3200)

- Light Dry Film
- 1 Hour Drying Time
- Repels Dust and Dirt
- Easy Removal

CRC ANTI-CORROSION LIGHT WET FILM is a thin, non-drying, protective, oily, penetrating wet film. The superior light film creeps into lap joints and crevices, and over all exposed metal surfaces, driving out moisture and providing a quick cover. The wet film clings firmly to protect surfaces against corrosion, and will not crack, peel or become brittle. The wet film has excellent lubricating properties which help prevent damage during start up. Parts treated with Anti-Corrosion Light Wet Film can generally be placed into service without removing the film, but it can be removed with solvents. (300g aerosol #3201)

- Light Oily Penetrating Film
- Drives Out Moisture
- Creeps for Crevice Protection
- For Easy Application

CRC ANTI-CORROSION HEAVY WET FILM is a heavy, clean, oily film that penetrates to drive out moisture. The heavy duty compound will give long term protection to all metal parts and assemblies that are subject to rust and salt corrosion. It is ideal for use on items in long term storage or during shipment. The excellent lubricating properties of Heavy Wet Film protect stored components when they are re-started. If required, it can easily be removed with CRC Brakleen or CRC Lectra Clean. Heavy Wet Film can be used on surfaces treated with Light Wet Film to give additional corrosion protection. (300g aerosol #3202)

- Heavy Clean Oily Film
- Displaces Moisture
- Rebuild without removal
- For long term equipment storage

CRC ANTI-CORROSION HEAVY WAX FILM is a heavy transparent amber film that is a long-term indoor/outdoor corrosion inhibitor for machined surfaces and assemblies that are subjected to long periods of storage or shipping conditions. It forms a durable, dry(waxy) film that has a high build capacity, and will not wash off or wipe off, even in severe conditions. Anti-Corrosion Heavy Wax Film protects against heat, humidity, chemicals or severely corrosive atmospheres. It may be easily removed with solvent prior to re-commissioning of equipment, or when maintenance is required. Where necessary, use Anti-Corrosion Light Wet Film first to drive out moisture and humidity. (300g aerosol #3203)

- Heavy Wax Compound
- High Build Capacity
- Durable Dry Film
- Won't Wash or Wipe Off
- For Severe Conditions

CRC TREFLEX CDT CUTTING OIL. Treflex CDT Cutting Oil is a superior cutting, drilling and thread cutting lubricant for use on all types of metals. Additives create a strong film that can withstand extreme pressure to increase tool life and improve cutting. It is ideal for the critical machining of non-ferrous metals for all operations in Machinability Group 2. (300g aerosol #3063)

CRC TREFLEX HD CUTTING FLUID. Treflex HD Cutting Fluid is an extreme duty cutting fluid. It is a thick fluid that sticks to the cutting tool throughout the operation. Considered environmentally safe. This fluid is ideal for tapping and drilling stainless steel, carbon steel, inconel, monel, hastelloy, titanium , aluminium and other alloys and exotics. (500ml #3065)

CRC TREFLEX AL CUTTING FLUID Treflex AL Cutting Fluid is a solvent based cutting fluid. It delivers equivalent performance without being labelled as a suspected ozone-depleting agent. Designed to provide superior lubricity and cooling in cutting aluminium and its alloys. Evaporates quickly, leaves little residue, and provides excellent finishes. (500ml #3067)

GEL TAC Gel TAC is a water resistant synthetic adhesive lubricant that is a specially formulated blend of high quality synthetic oils with anti wear additives, friction modifiers and tackiness agents. Gel TAC's non-drip gel has a very low fling off, penetrates deeply then sets to form a water resistant long lasting film. Gel TAC has a very high temperature performance (-35°C to +300°C) and is designed for general use in workshops, mining, heavy industry and around the house. 350g aerosol #3135

NF TAC2 NF Tac2 is a non-flammable exceptional lubricant with a tough adhesive quality which will bond to chain/wear surfaces. NF Tac2 resists salt corrosion, hot water wash-off and extreme temperatures (-25°C to +165°C), while at the same time providing continuing lubrication and anti-wear protection. 500g aerosol #5036

DI-ELECTRIC GREASE Di-Electric Grease seals, lubricates, waterproofs and insulates electrical connections with a thin, non-curing silicone compound. This helps maintain electrical performance by reducing line sag and voltage drops. It prevents arcing and extends service life. Di-Electric Grease is also excellent for lubricating and sealing rubber and plastic parts – including ‘o’ rings. 284g aerosol #3082 14.2g tube #5109 8g pillow #5107

LEAK DETECTOR CRC Leak Detector is formulated for the quick detection of gas and air leaks. The water based formula contains no oils, silicones or harmful solvents. Leak Detector quickly and reliably locates gas leaks and pressure losses in pipes and pressurised systems by forming highly visible bubbles when applied over leaks. 510g aerosol #14503

HYDROFORCE SUPER CITRUS CRC HydroForce Super Citrus heavy duty cleaner is a naturally formulated blend of d-limonene and soy that offers that superb cleaning power of citrus. Super Citrus dissolves grease, oil, ink, tar, asphalt and many other industrial residues. It wipes off easily and leaves no residue and is safe on most plastics. 5 gallon pail #14442

CRC 2-26 displaces and seals out moisture, prevents corrosion, cleans, lubricates and penetrates. CRC 2.26 is a stable, inert organic formula, especially prepared to prevent and repair electrical failures due to moisture, corrosion, dirt or friction. (150g Aerosol #2004, 500g Aerosol #2005, 4L #2009, 20L #2009, 200L #2011)

CRC ELECTRICAL QUALITY SILICONE is a high-quality multi-purpose formula that lubricates, waterproofs and protects with a thin clear film that is non corrosive and non staining. It has superior lubricity for metal to non-metal surfaces and is non hardening to help eliminating corrosion. (300g Aerosol #2094)

CRC GO CONTACT CLEANER'S plastic safe formula is a technically proven, stable, inert high purity cleaning solvent. Non-corrosive, non-staining, rapid complete evaporation – contains no lubricants. Removes light contaminants, dust, lint, atmospheric oils, finger print, moisture from precision electrical/electronic equipment where lower-flashpoint solvents may be used. (150g Aerosol #2015, 350g Aerosol #2016)

CRC NF CONTACT CLEANER is a revolutionary Precision Cleaning Solvent. Instantly removes grease, oil, dirt, flux and other contaminants. Chemically stable, non-conductive, non-corrosive. High purity formula evaporates rapidly and leaves no residue. Strong cleaning action for the removal of flux, oils and other contaminants. No Flash Point. Non-flammable. (400g Aerosol #2017)

CRC CONTACT 2000 has been specially developed as an effective alternative to CFC 113 based cleaners. CRC Contact 2000 is chemically inert, non flammable and has thermal stability with rapid and complete evaporation. Removes light contaminants, atmospheric oils, dust and lint from precision electrical/electronic equipment. Leaves no residue to increase resistance. Safe on most plastics. (200g Aerosol #2012)

CRC ELECTRICAL PARTS CLEANER is a Non-Chlorinated Solvent Cleaner that contains no Trichloroethylene. It is fast drying and leaves no residue. CRC Electrical Parts Cleaner is ideal for degreasing electric motors, pumps, generators and most heavy electrical equipment. (400g #2019, 4Litre #2021, 20Litre #2022, 200Litre #2025)

CRC LECTRA CLEAN is a unique, scientifically formulated cleaner and degreaser that effectively removes moisture, grease, oil wax, dirt and other contaminants from motors, parts and other electrical/mechanical equipment. No flash point. No fire point. Use CRC Lectra Clean to clean electric Motors, High Voltage Switch Gear, Alarms, Air conditioners, Bus Bars, Cables, Gear Boxes, Pumps, Generators, Welders, Compressors, Transformers, Fork lift Trucks, Surfaces prior to anti-corrosion coatings. (400g Aerosol #2018, 4 Litre #2020, 20 Litre #2023, 200 Litre #2024)

CRC SWITCH CLEANER LUBRICANT has been specially formulated to provide the single operation of both cleaning and lubricating sensitive switches and contacts. This excellent lubricating and protective film is ideal for precision drive mechanism and moving switch and contact mechanism. This effect also eliminates the problems of wear, friction and contact resistance, particularly in sliding contacts and connectors. (300g Aerosol #2001)

CRC FREEZE SPRAY is a multi-purpose dry coolant maintenance trouble shooting and repair. Used to isolate circuits or components while testing for heat-induced failures, to protect sensitive components from high temperatures during soldering and desoldering and help locate hairline cracks in PC boards. (300g Aerosol #2039)

CRC ZINC IT is a single component Zinc rich compound with the special epoxy binder and contains over 90% of highest purity Zinc in the dried film. It fuses directly to a clean iron or steel surface through electrochemical action and presents a hard, single-time protection against corrosion for many years. It is not a paint. The sacrificial coating actively fights rust and corrosion creepage with a flexible, continuous film. (350g Aerosol #2085)

CRC PLASTICOTE 70 is the Universal Protective Film for Printed Circuits and is formulated to protect printed circuit boards from current creepage and short circuits. (300g Aerosol #2043)

CRC URETHANE SEAL COAT is a stable single component polyurethane coating that dries fast, adheres well and forms a hard, durable, flexible and non conductive film and is available in a clear and red coating. (RED 300g Aerosol #2044; CLEAR 300g Aerosol #2049)

CRC LECTRA SHIELD is an inhibited coating that forms a transparent, amber film that dries to touch in one or two hours and is ideal for: air conditioning equipment, cable end sealer, moulds, airport and aircraft maintenance. (Aerosol #2031)

AIR DUSTER Air Duster is a multi-purpose cleaner for the safe removal of dust and lint from all delicate precision equipment. Air Duster is non-corrosive and leaves no residue or condensation.
