### Ness Radio Keys

Ness Radio Keys provide the convenience of radio remote control for arming/disarming your alarm system, wireless panic button operation and optional home automation applications such as operating lights around the home or electric garage doors, (with suitable optional interfaces).

All Ness radio keys are rugged and waterproof with long life lithium batteries supplied as standard. Battery life is at least 5 years and up to 10 years for the RK4, (depending on the total number of transmissions).

The RK1B radio key pendant is supplied with a free wrist strap and neck chain. RK1B is waterproof and is perfectly suited for use as an emergency button worn on the person.

Batteries are included with all Ness radio keys.
