NEW EXCEL LIFE. **A SWITCH FOR** THE BETTER.

Legrand is proud to present the all new Excel Life range, developed by a global team in both Australia and France over 24 months. Excel Life pushes improvements in both product design and manufacturing to bring a new level of excellence to the products you use every day. It's what we call everyday excellence.

You trusted the Excel product for decades. A trust built on reliability. The new Excel Life continues the commitment to best-in-class products, the same commitment that makes Legrand the world leader in manufacturing and supply of switches and outlets.

The modern design features slimmer plates and contemporary switches, to meet the needs of today's customers. But the improvements go well beyond just looks. The new Excel Life also delivers greater flexibility and control through miniaturising technology and modularity, delivering a product perfect for the contractor, specifier and end-user.

MINIATURISING TECHNOLOGY

Gone are some of the bulky mechanisms of the past. They've been replaced by smaller mechanisms designed to fit into a standard switch hole, so more can now be achieved from the one switch plate.

MODULARITY

Make unique combinations of products onsite powerpoints are now available with spare function holes ready for you to slot in any extra mechanism you need. Add a surge protection module to a double powerpoint, for example.

ENVIRONMENTAL AWARENESS

Legrand is committed to delivering environmentally responsible products. The environmental footprint of Excel Life product is smaller than any similar product on the market. Excel Life also proudly boasts an industry first by introducing Product Environmental Profiles (PEPs) for key products. The PEPs outline materials, manufacture, distribution, usage and end of life product management details. They can help you make more educated decisions and assist you with your project documentation.

HIGHLIGHTS

Watch out for the new Excel Life range in stores; new products will be released regularly so to keep up-to-date go to www.legrand.com.au and sign-up for 'Newslink', our new product newsletter. Here's a sneak peek of some of the new range:

LED Illuminated Dolly Ring Kit

Single module Surge Protectors and Time Delay Mechanisms

۲

۲

Secure Plate Series with screw lock

Multi-function All-in-one Rotary Switch

LED Indicator Kits

EXCEL LIFE IS AVAILABLE IN 2 FORMATS.

THE ALL NEW COMMON PLATE SERIES

An all new offering, this series features a common coverplate that can be used across the entire range. It's perfect for projects where easy maintenance is important.

THE DEDICATED PLATE SERIES

This series is the progression from HPM Excel, the product you know. A slimmer look and new rockers only hint at the exciting changes.

۲

۲

5

ES777WE

Coverplate can only be removed with a screwdriver

SECURE PLATE SERIES

There are times when you need a little extra protection, from theft and damage. Projects like schools, public areas and anywhere that precautions are needed against vandalism. The Secure Plate series now offers the peace of mind of a cover plate that can only be removed with a screwdriver. Off-the-shelf solutions are available in one to six gang switches, single and double powerpoints. But it's also good to note any common plate series product can be fitted with a secure coverplate (ESCWPLWE).

7

SWITCHES

Choose from a wide range of switch mechanisms, from 5A electronic push buttons to 32A rockers and 'no-touch' options, there is something to suit all installations, budgets and customers.

STANDARD 770 ROCKER

Our standard rocker has been improved to 16A with a 16AX fluoro rating.

EM770WE

۲

EM770DUOWE

DUO 770 ROCKER

The Duo rocker allows you to switch two points from the one opening in a switch plate, which is great when retrofitting and you need an additional point because you can use the existing plate to reduce cost and wastage. The Duo mechanism allows you to switch more than six outputs from a standard plate, add two mechanisms and you can switch 8 outputs. Perfect when you're switching loads that are normally switched together but need to be switched individually sometimes.

NO TOUCH SWITCH

Perfect for any environment where hygiene is paramount or for customers who just want that extra technology. The No Touch switch activates by simply passing your hand within 50mm of the switch.

EC914WE

ELECTRONIC PUSH BUTTON

A 3 wire switch with onboard programming that allows you to program the LED indicator to be RED or BLUE. You can also choose if the LED is completely off when the switch is not in use, or if it is on, but at a reduced brightness level.

Use with 'slave' switch for multi-way switching.

EM883WE

EM800SLAVEWE

ILLUMINATED DOLLY RING

A brand new innovation that allows you to add a unique LED illumination ring to any standard 16A or 20A 770 rocker. Whether your customer is looking for a stylish design touch or a way to find the switch in the dark – the new Illuminated Dolly Ring Kit is the perfect solution.

DIMMERS

The new Excel Life range of dimmers provide whisper quiet operation and have overcome the annoying flicker caused by ripple injections in the mains supply. They are also fitted with over temperature protection, automatically dimming the lamp if it is overloaded or insufficiently derated.

The range includes 250VA, 400VA, 700VA trailing edge rotary dimmers and a 450VA universal electronic push button dimmer.

On board programming allows you to set the LED to be blue or red

UNIVERSAL ELECTRONIC PUSH BUTTON

Choose a red or blue LED indicator with the onboard programming. Onboard programming also allows you to choose if the LED indicator is completely OFF when the switch is not in use, or if it remains ON at a reduced brightness to aid in locating the switch in the dark.

The universal 450UP also features a clever brightness memory, returning to the last brightness level used when the switch is activated. It can also be used with the Slave Switch (EM800SLAVEWE) for efficient multiway dimming.

Suitable for use with electronic and wirewound transformers.

EM450UPWE

Use with 'slave' switch for multi-way dimming.

EM800SLAVEWE

ROTARY DIMMERS

Suitable for use with electronic transformers the new rotary dimmers feature easy grip and lower profile knobs.

EM250TRWE & EM400TRWE

۲

An all-in-one rotary switch module that can do it all - 180°, 270° and 360°. Ideal for use with ceiling fans, but flexible enough to be used with motorised shutters and awnings. It also works with sensors, such as the Aquascan (630/9), so your customer can select lights ON, in movement sensor mode, or OFF.

The rotary switch offers 6 marking plate options so you can tailor the product for the job.

Current Rating: 16A, 16AX (fluoro).

MARKING PLATE OPTIONS

MAZ

۲

۲

EMRSWE

۲

SHUTTER SWITCH

The ideal switch for controlling roller shutters or similar devices such as motorised blinds, awnings and curtains.

Available in two options: Direct model (EC920) and Relay model (EC919). Both are rated 6A.

EM802TDWE

Perfect for use in stairwells of apartment buildings and similar situations, this Time Delay Switch offers a simple 2 wire product that's quick to program and works well with CFLs, delivering a flicker free result. Program one to ten minute time delays in one minute increments. The handy 770 module size means you can slot it into any normal switch hole.

EC923TWE

This switch allows you to program up to 8 weekly scenarios, making it the only choice for use in situations when lights need to be turned on and off at specific times such as schools, shops or sports facilities. It can also be used in conjunction with a motor such as a pool pump. Should the power go out, a working reserve will ensure the programming is maintained for 20 hours.

EM802TDWE

16

 (\mathbf{b})

EC923TWE

POWERPOINTS

The new Excel Life powerpoints all include internal safety shutters as a standard feature, ensuring extra peace of mind for your customers. There are plenty of innovations with you in mind as well: inline terminals on double GPOs and 4 corner fixing options simplify installation.

For even greater flexibility on site, Excel Life powerpoints are available with an extra mechanism hole. Create the solution you need on the spot by adding the extra mechanism required, from a surge protection module to an oven switch.

COMMON PLATE SERIES

Add a surge protection • module, 20A switch – whatever

mechanism you need!

Minimum load = 10VA for all load types

Note: Compact Fluorescent Lamps (CFLs), also known as Energy Saving Lamps, can only be dimmed if they are specifically marked as "dimmable". Dimmable CFLs may have different characteristics from brand to brand, and so each brand may require a specific type of dimmer to operate correctly. Using the incorrect dimmer may cause the CFL to flicker. Please read the documentation that comes with each CFL carefully to ensure that the CFL and dimmer are compatible. For more information, please contact HPM Legrand. In some cases, the dimmable CFL may turn off or flicker when dimmer dto a very low brightness. This can be overcome by ensuring that the dimmer brightness is not set too low. See "Setting minimum brightness" for instructions on how to achieve this.
