EtherNet/IP Tap1 Copper Port, 2 Fiber Ports

- Enables greater topology configuration choices for EtherNet/IP applications, such as linear and device-level ring (DLR)
- Allows for a high-performance ring capability (make/break < 3 ms), complete with diagnostics and fast recovery to lower downtime
- Supports IEEE 1588 precision time protocol (PTP) for precise time synchronization and Quality of Service (QoS) to help prioritize data transmission
- Includes open standard technology which is available to 3rd party vendors and allows EtherNet/IP interoperability
