

Meter Panels

WhiteAnt Meter Frames are a great alternative to metal meter boxes. Hand crafted and Australian made!

Some of the great features of the WhiteAnt board are:

- Wooden frames mean no earthing required
- The panels are pre-marked for service fuses & neutral link
- Fully insulated sides and back

Removable front hinged panel

The WhiteAnt boards are made from Ty-Panel "Type X" switch panel, fire-retardent "FibroCement" back panel, Australian plantation pine frame and Netalite 7 insulation.

The following three sizes are available off the shelf. Custom frames & panels can be ordered.

Model	Dimensions	Description
WA4	374mm H x 204mm W x 75mm D	16mm cable max. 1 x SP meter, 1 x Electronic meter or 1 x multiphase meter 1 x service fuse 1 x neutral bar/link
