

About Salamander Fittings

Salamander Fittings has been, for the last 15 years, the leading supplier of quality steel and ABS electrical conduit and fittings to the Australian Resource, Oil & Gas Industries, Water treatment plants, Alumina Refineries and many other industrial projects.

Our products are used by BHP, Woodside, Chevron, Western Power, Horizon, Wesfarmers, Aquasure Water Corp and many others.

The products are manufactured to the Australian Standard AS/NZS 2053.7. We keep in stock a large range of steel and ABS conduit and the associated fittings.

In July 2016 J G Thomas Pty Ltd purchased Salamander Fittings and will continue to supply the market with Salamander Conduit and Fittings.

J.G. Thomas

Over the last 45 years the company's primary focus was to serve as a Western Australian agent and distributor for Australian manufacturers. We are sourcing only quality products and consistently delivering outstanding customer service.

Today, J.G. Thomas Pty Ltd continues to supply top quality Australian and international products to Western Australia's electrical, chemical, engineering, and industrial sectors. Our Perth-based team also offers a level of technical knowledge and support that is unmatched in their field in WA. J.G. Thomas distributes thousands of products to electrical wholesalers, electrical contractors, industrial operations, mine sites, oil and gas facilities, and engineering firms in Perth and throughout WA.

Our product range includes:

- Electrical Heating Elements
