Madison Keystone Shuttered Bezel

Summary of features

- Designed to suit Keystone RJ45 Cat5e/6 & Cat6a jacks
- Prevents damage that results from unauthorised access or misuse
- Designed to mount in Clipsal-style wall face plates
- Easy to install
- Protects RJ45 pins when the data port is not in use

This item is ideal for the following applications

Health

Protection for data ports in high traffic and sensitive areas.

Education

High traffic areas such as libraries, computer rooms, class rooms, lecture halls

Public Spaces

Public spaces such as libraries, food courts, shopping malls, conference rooms, hotels, motels.

The Madison Technologies Keystone Shuttered Bezel is ideal for applications where data ports may need additional protection when not in use.

Compatible with any RJ45 jack that has a keystone footprint. The Madison Keystone Shuttered Bezel is essential where data ports are located in high traffic, high use areas.
