A fitting end to this **network connectivity solution**

A fitting end to this **network connectivity solution**

Wall-mounted and free-standing network **data cabinets**

Technology waits for no business and in the datacomms industry, there's a need for supported infrastructure to evolve with it.

A complete network connectivity solution is required to fulfil the needs of today and for years to come. Clipsal by Schneider Electric has that solution.

The company has serviced the Australian datacomms market for many years, with everything from data connectors and cables, through to fibre and cabinets. Data cabinets play a key role in this end-to-end network connectivity solution, by housing horizontal cabling and active equipment.

And now you have even more choice, with a new range of wall-mounted and free-standing network data cabinets to suit any application. They come in a variety of dimensions, plus with additional, optional cabinet accessories to ensure that your small office, commercial office or your data centre needs are fully covered.

The complete network connectivity solution:
from connector to cabinet

W A L L - M O U N T E D   C A B I N E T S

When you use the entire Clipsal Actassi Network Connectivity Solution, **your datacomms products are covered by your end-to-end warranty.**

From small home office through to commercial projects

Data Cabinets round out the Clipsal Actassi Network Connectivity Solution, which also includes a comprehensive range of data, fibre and structured cabling products:

• Copper and optical fibre cables

• Cross connect products

• Cabinets and accessories

• Installation and termination tools

• Voice products

• Wall plates and labelling

The Actassi product range is backed by superior after-sales service and support from the largest sales force in the electrical and datacomms industries. Clipsal by Schneider Electric customer support staff will provide you with expert advice to ensure that your next project is a complete success.

For added peace of mind, it's also nice to know that when you use the entire Clipsal Actassi Network Connectivity Solution, your datacomms products are covered — from connector to cabinet — by your end-to-end warranty.

FREE-STANDING CABINETS

Simply think about what you want and where you want it — **there's a Clipsal Actassi Data Cabinet for any application.**

Wall-mounted network data cabinets

Clipsal Actassi Wall-Mounted Cabinets are powder-coated and made from 1.2mm steel, to ensure that they stand the test of time.

The wall-mounted range of cabinets comes in 6RU, 12RU and 18RU, with front and rear mounting rails supplied. The mounting rails are set 19 inches apart and in line with International Standards. The tinted perspex front door allows for a quick visual inspection inside the cabinet and the optional cabinet with swing frame now makes installation even easier.

Various sizes, a neutral colour and the aesthetically-pleasing design make these wall-mounted cabinets ideally suited for a small office, home office or even within a classroom.

Perfect for small offices, home offices and classrooms

Features and Benefits

- Welded framework ensures a high level of strength for wall-mounting application, without any flex and twist in the cabinet

- Powder-coated, neutral coloured finish RAL 7035 (Light Grey) to blend into any surroundings

- Swing frame cabinets provide easy access to rear of cabinet

- Front and rear mounting rails supplied so gear can be mounted to the rack as required, i.e. front, rear or both

- Fully adjustable, 19" mounting rails, to suit various depths of equipment

- Top and bottom cable entry points to allow for easy access into cabinet

- 4.5mm lockable, framed glass front door for quick inspection of equipment without compromising security

Free-standing network data cabinets

Clipsal Actassi Free-Standing Network Cabinets are the most versatile data cabinets in the entire Actassi range.

The free-standing network cabinets come in a Raven Black, powder-coated finish, and in a variety of rack unit widths and depths. All cabinets come with both front and rear mounting rails, and are numbered for easy RU identification.

The top of the cabinets are ventilated for heat dissipation or for mounting a four-fan unit. With easiiy removable cable entry points at the top and bottom, there is no need for cabinet manipulation to get your horizontal cables inside.

All cabinets come with castors for easy relocation and installation, and also with stabilising feet to lock the cabinet in place.

The cabinet comes with a 4.5mm lockable, framed glass front door and dual perforated, lockable rear doors at the back. All 800mm wide cabinets are provided with vertical cable management rings for the height of the unit, to allow for neat patching of services.

These free-standing network data cabinets are perfect for small or medium office applications, right through to commercial projects.
