

Features and Benefits

The 24 Fibre Splice Tray with Integrated Fibre Management and external fibre management and pivotal splice holding arrangements, allows the installation of 24 optical fibres without the need to fit additional fibre management. This makes it ideal for fitting into small wall boxes and enclosures or for any installation requiring fibre. The tray is capable of holding up to 24 x 900µm fibres with heat shrink splice protectors.

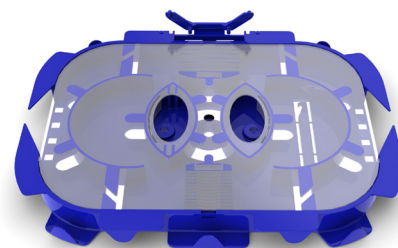

- External Fibre cable management allows for easy storage of excess fibre
- Allows for multi-directional routing of entry and exit fibres, allowing the tray to be mounted vertically or horizontally
- Maintains 30mm bend radius, ideal for 250µm or 900µm fibre
- Internal cable management allows for multiple fibre routing options including cross over
- Pivoting splice holders allow uninterrupted control of fibre during splicing
- Built-in fibre pick can be used to withdraw individual fibres
- Will hold up to 24 heat shrink style splice protectors
- Tray is stackable with supplied tray hinge, which also allows for easy access
- Tray comes with a clip in transparent lid
- Cable ties point to secure fibre on entry and exit
- Mountable via centre hole, DIN style holes or double sided foam adhesive pad

Technical Information

Mechanical Characteristics

Material: ABS polymer
 Fibre Termination Options: Direct, Fusion Splice, Mechanical Splice, Pre-Terminated MTP

Dimensions:
 168mm W x 124mm D x 13mm H
 Shipping Weight: 81g

ORDERING INFORMATION

Order No.	SAP No.	Description
AFR-00470	180600219	Universal Splice Tray, 24 Fibre with built in Cable Management for 1U Multi-Function Fibre Enclosure (2 pcs)
Compatible with		
RFR-00311	180370276	1U Multi-Function Fibre Enclosure
