

Indoor Digital TV Antenna

VHF/UHF (6-12)(28-51)

01MM-CA02

For the Best

The 01MM-CA02 is the solution to one of the most persistent problems faced by those looking to own an indoor TV antenna – namely, finding a stylish but not obtrusive solution. The sleek, attractive design of this model fits with any décor. Combined with clear reception for channels 6 to 12 and 28 to 51 and a 694MHz low pass filter for reducing 4G/5G (LTE) interference, this is a superb fusion of style and substance in one sleek antenna.

Features and Benefits

- » Receives channels 6-12 and 28-51
- » Simple plug and play solution
- » Attractive design enables antenna to fit with most décors
- » 694MHz low pass filter to reduce 4G/5G (LTE) interference
- » Perfect for apartments and units where it is difficult to run new outlets
