Overview

Easy56 combination switched sockets by Schneider Electric have a modular 101 x 201mm design that allows installers to mix and match covers on to two, three or four gang enclosures (bases). The two piece cover also means this modular range can have switches or sockets replaced separately during maintenance upgrades allowing increased affordability. These products are available from 240V, 10A to 415V, 32A.

ON and OFF positions are clearly marked with raised lettering so they will never wear off. A provision for an 8mm padlock is provided for locking OFF

Less enclosure (base) options are also available for single phase 10A and 15A products.

Overview

Easy56 combination switched sockets are also compatible with Clipsal 56 series accessories which provide further flexibility. This means if other amperages or voltages are required, it is recommended to refer to the Clipsal 56 series range.
