AIRBUS

TOTAL EXHAUST SOLUTION

FORM AND FUNCTION

Ventair modular fascia and extraction adaptation system – configurable bathroom ventilation extraction system that features modular fascias for rapid and reliable attachment for the Ventair Modular 150 or duct adapter unit.

The range is designed to be used with Ventair In-line exhaust fans and accessories – like the Mixflow or Inline 150 exhaust fans.

The Airbus Exhaust Fan range includes white and black fascias in round or square, as well as these items with LED light panels that includes the SELV LED driver.

The LED light panel range includes a quick connect plug-in driver with pre-fitted plug and lead and energy saving IP44 wet area safe SELV LED lighting.

The low installation depth and side ducted design makes installing in tight space like multi story applications possible.

Airbus Range Features

- Stylish slim line design.
- Super low profile.
- Available in a wide range of fascia colours and styles.
- 10w LED Light panel options including driver with quick connection 12V plug and pre-fitted 240V supply lead and plug.
- Choice of 150mm duct connecting ceiling plenum with 90° moulded plastic elbow outlet and backflow preventer for unimpeded airflow, OR adapter unit.
- Fascias are easy to install, remove and clean.
- 5 Year warranty.

SIMPLY CONFIGURE TO SUIT

Step 1: Choose an inline fan and 150mm ducting

Mixflow 150
(VMFIL150)

Inline 150
(INL150)

PRODUCT CODES

VMFIL150	High powered 50/40 watts Mixflow exhaust fan
INL150	28 watts Inline exhaust fan
VAD150-3	ø150mm x 3m Flexible Aluminium Ducting
VAD150	ø150mm x 6m Flexible Aluminium Ducting
VMFK150	ø150mm Modular Fascia Adaptor
VMFA150	ø150mm Adaptor Unit

Step 2: Choose a duct connector

Modular 150
(VMFK150)

Adaptor Unit
(VMFA150)

DIMENSIONS

Step 3: Choose an Airbus 200 fascia
