

Product Environmental Profile

M171 Opt. Display 14I/O Modbus 100-240Vac

General information

Representative product	M171 Opt. Display 14I/O Modbus 100-240Vac - TM171ODM14R
Description of the product	The Modicon M171 Optimized Logic Controller is a programmable controller with LCD display ideal for use in variety of HVAC/R and other applications.
Description of the range	The Modicon M171 Optimized logic controller (M171O) family is the compact option in the Schneider Electric platform of programmable controllers and LCD displays, and is ideal for use in a variety of HVAC/R and other applications. The environmental impacts of this referenced product are representative of the impacts of the other products of the range which are developed with a similar technology.
Functional unit	To control simple and compact machines for HVAC applications (e.g. fans and water pumps) and a 100% of the time for 10 years

Constituent materials

Reference product mass	296 g	including the product, its packaging and additional elements and accessories
------------------------	-------	--

Plastics	11,7%
Metals	11,5%
Others	76,9%

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

As the products of the range are designed in accordance with the RoHS Directive (European Directive 2002/95/EC of 27 January 2003), they can be incorporated without any restriction in an assembly or an installation subject to this Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

The M171 Opt. Display 14I/O Modbus 100-240Vac presents the following relevant environmental aspects

Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 120,3 g, consisting of Cardboard (99,89%), PP(0,11%) Product distribution optimised by setting up local distribution centres
Installation	The analysis does not include the installation phase
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains electronic cards (142g) that should be separated from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Recyclability potential: 11% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	10 years			
Product category	Other equipments - Active product			
Installation elements	No special components needed			
Use scenario	It is 4 W in active mode 100% of the time for the referenced TM171ODM14R			
Geographical representativeness	Worldwide			
Technological representativeness	The Modicon M171 Optimized Logic Controller is a programmable controller with LCD display ideal for use in variety of HVAC/R and other applications.

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.6.0.1, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

According to this environmental analysis, proportionality rules may be used to evaluate the impacts of other products of this range.

Depending on the impact analysis, the environmental indicators (without ADPe) of other products in this family may be proportional extrapolated by energy consumption values. For ADPe (Abiotic depletion), impact may be proportional extrapolated by mass of the product.

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
