

Product Environmental Profile

THALASSA PLA

General information

Representative product	THALASSA PLA -NSYPLA1073
Description of the product	Thalassa PLA Enclosure product is to protect, integrate and allow the fastening of electric, electronic or mechanical devices. This product is a floor-standing polyester enclosures used for outdoor conditions.
Functional unit	To protect persons during 20 years against direct contact with live parts and allow monitoring, control and the protection of the components inside the enclosure from weather condition in a single enclosure or a cabinet having the dimensions 1000mm x 750Lmm x 320mm , while protecting against mechanical impacts (IK8 - IEC62262) and the penetration of solid objects and liquids (IP65 - IEC 60529).

Constituent materials

Reference product mass	34300 g including the product, its packaging and additional elements and accessories
-------------------------------	--

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

As the products of the range are designed in accordance with the RoHS Directive (European Directive 2002/95/EC of 27 January 2003), they can be incorporated without any restriction in an assembly or an installation subject to this Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

The THALASSA PLA presents the following relevant environmental aspects

Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 9624.6 g, consisting of Wood (Plain, for pallet) (76%), Cardboard (Corrugated) (12.6%), Cardboard (Duplex-Triplex) (8.2%), LDPE Film (2.5%), PP (Polypropylene) (0.5%), Paper (0.3%). Packaging recycled materials is 20% of total packaging mass. Product distribution optimised by setting up local distribution centres
Installation	The product does not require special installation procedure and requires little to no energy to install. The disposal of the packaging materials are accounted for during the installation phase (including transport to disposal).
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials No special end-of-life treatment required. According to countries' practices this product can enter the usual end-of-life treatment process. Recyclability potential: 6% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	20 years			
Product category	Enclosures			
Installation elements	No special components needed			
Use scenario	This product does not have any energy consumption			
Geographical representativeness	Europe			
Technological representativeness	Thalassa PLA Enclosure product is to protect, integrate and allow the fastening of electric, electronic or mechanical devices. This product is a floor-standing polyester enclosures used for outdoor conditions.			
Energy model used	Manufacturing	Installation	Use	End of life
	Energy model used: Molins, Spain	0	0	0

Compulsory indicators		THALASSA PLA - NSYPLA1073					
Impact indicators	Unit	Total	Manufacturing	Distribution	Installation	Use	End of Life

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.5, database version 2015-04.

The manufacturing phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration N°	SCHN-00074-V01.01-EN	Drafting rules	PCR-ed3-EN-2015 04 02
Verifier accreditation N°	VH25	Supplemented by	PSR-0005-ed2-EN-2016 03 29
Date of issue	11/2016	Information and reference documents	www.pep-ecopassport.org
		Validity period	5 years
Independent verification of the declaration and data, in compliance with ISO 14025 : 2010			
Internal	External	X	
The PCR review was conducted by a panel of experts chaired by Philippe Osset (SOLINNEN).			
The elements of the present PEP cannot be compared with elements from another program.			
Document in compliance with ISO 14025 : 2010 « Environmental labels and declarations. Type III environmental declarations »			
Environmental data in alignment with EN 15804 : 2012 + A1 : 2013
