

- Marine grade 316 (non-magnetic) stainless steel construction.
- Polyester Coated
- Unique, stainless steel 'ball bearing' locking mechanism.
- Rounded 'off-set' tip, to speed up insertion.
- Smooth rounded edges, for safe handling.
- Self-locking, for easier and faster installation compared with traditional restraint systems.
- An efficient and effective way of securing cables or other materials in environmentally harsh and corrosive conditions.
- Provides heavy duty and long-lasting cable bundling solution in comparison to nylon cable ties.
- Suited to: Commercial, Industrial, Mining, Marine and Infrastructure installations.

Working Temperature	-40°C to 110°C
Minimum Tensile	1568N (160Kg's)
Chemical Resistance	Excellent
Flame Retardant	Non Flammable
UV Resistance	Excellent
