

Motion Sensor for Pierlux Eco Highbay

ECOHBSFHF

- ‘Plug and go’ installation - The sensor is supplied with a pre-fitted piggyback plug and socket. This allows fast installation, without any additional terminations for the sensor or the highbay.
- One-Key Commissioning (using the optional remote control) - Using an optional remote control, the required sensors settings can be programmed and saved as a custom scene into the remote.
- Intelligent Photocell (daylight detection prior to motion detection) - The built-in photocell will automatically turn off the light when the ambient natural light exceeds the programmed lux level for more than 5 minutes.

Performance

CRI	0
Operating Temperature	-20 - 50°C
Ingress Protection Rating	IP65
Warranty	5 Years

Electrical

Voltage	240V
---------	------

Physical

Weight	0.25kg
--------	--------

Sensor

Sensor Type	Microwave
Integrated Light Level	Yes
Sensor Height Max	10m
Sensor Length Max	6m

Accessories

PRC11	REMOTE CONTROL FOR PROGRAMMING PIERLITE SENSORS (TYPE 11)
