Electrical & Telecommunications Pits

Heavyduty, lightweight Plastic Pits

Mascot Engineering introduces its range of Plastic (Polymer) Pits, manufactured from UV stabilised black polyethylene. Mascot Plastic Pits have been developed in conjunction with the major national authorities in the telecommunications and energy sectors. They are lightweight and manufactured with a heavy duty sidewall that ensures structural integrity during installation. For your benefit, our plastic pits can also be stacked inside each other for easy transport and efficient storage.

To suit the entire P1 to P9 range of plastic pits, we offer Concrete Covers and Galvanised Mild Steel (GMS) Checkerplate Lids. The Concrete Covers are NBN compliant and available with "Communications", "Electricity" and "NBN" markings. Our GMS Checkerplate Lids have a Class B load rating along with various locking options to suit your needs.

In addition to our plastic pits and covers, we now stock the full range of corresponding accessories. These include Risers (Collars), Gaskets, and Cross Bars for use when multiple covers are used on larger enclosures.

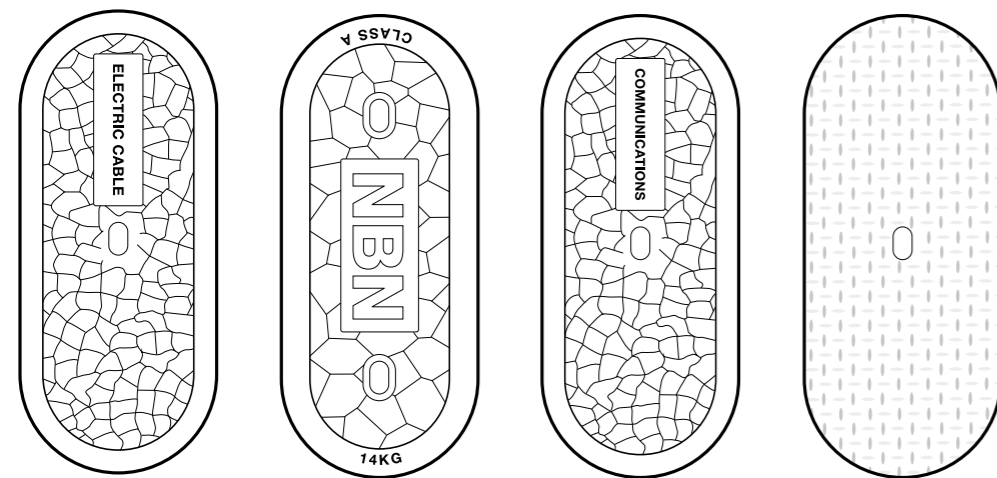

- The Mascot Engineering Plastic Pit range includes:
- Sizes from P1 to P9
 - Concrete Covers ("Electricity", "Communications" & "NBN" markings)
 - GMS Checkerplate Covers (Blank, "Electricity" & "Communications")
 - NBN compliant concrete covers
 - Telstra Approved Pits
 - Pit Gaskets
 - Cover Cross Bars (Iron)
 - Lockable lid options
 - Lifting Keys

Need something heavier duty?
