

1U Multi-Function Fibre Enclosure - Gen II

molex

The 1U Multi-Function Fibre Enclosure is a configurable rack mount unit for storing and terminating incoming fibre cable.

The fibre enclosure has been designed to accommodate various termination types and adapter configurations. The floor of the enclosure is constructed to allow maximum flexibility in routing fibres. Constructed with a ball bearing slide mechanism allows ease of access to fibres. The interchangeable front plate facilitates upgrades as required. The enclosure has an optional front locking kit and an optional front cable management to securely route patch cords.

Features and Advantages

Accommodates up to 4 ModLink Quick Connect Cassettes which allows 12-24 fibre connections per cassette with various interfacing adapters

Accommodates up to 4 Modular Splice Cassettes which allows 6-24 fibre connections per cassette. The cassettes allow for splice termination while protecting individual fibres

Compatible with preloaded FMP 3 style adapter plates in various fibre counts and adapter configurations

Self-adhesive fibre management hub is stackable and can be segmented providing individualisation of fibre routing

Optional 24 fibre splice tray available to maximise port capacity while providing fibre management for excess fibre

Optional front cable management allows for secure routing of patch cords can be retrofitted

Optional locking kits provides security with its over-locking curved cam lock by locking into the top of the enclosure. The hinged top allow easy moves, adds and changes, and can be retrofitted

Compatible with Molex's 6 Pak Adapter plate program that allows 6-24 fibre connections per plate, 72 fibre MTP connections and 3 DataGate copper/synergy connections per plate

Incorporates heavy duty ball bearing slides for smooth and limited extension of the drawer, allowing access

Rugged steel construction in black
