

End Panel for PR2V Managers, 45 RU, Black PR2VEP

The PatchRunner™ 2 End Panel closes off the end of row to protect cabling, and it provides a clean aesthetic to the solution. The end panel is metal with hanging features to speed up installation and reduce safety risks. The two part design reduces the size of the carton for easier transport throughout the site and less risk of transit damage. The end panel is 45 RU and is black.

Specifications
