Zellweger Noise Filters

Mains power noise filter. Most electrical systems have noise present, and this can sometimes be heard in a ceiling fan. Ripple control signals and dimmer noise may sound like buzzing in the fan, and is NOT caused by a defect in the ceiling fan. Installation may reduce the noise induced into ceiling fans by electricity providers ripple control signaling (off-peak) Ratings: 240v , 180w max load (0.75RMS)

Available in Frequencies:

Part #: 008 - 750Hz

Part #: 007 - 1050Hz
