PAIR COIL

Pre Insulated Annealed Copper

R32 & R410a Rated

Conforms to AS/NZS1571 Copper - Seamless
tube for Air Conditioning and Refrigeration.

Saves Time and Money

Installation using pre-insulated Pair Coil reduces fitting time and gives a neater more durable finish.

High Quality Durable Insulation

Manufactured from cross linked closed cell polyethylene with embossed polyethylene exterior for improved durability.

Make Installation Easy

The insulated coating is durable and more resistant to abrasions than traditional materials. It is easier to install in tight spaces and reduces install time as the insulation doesn't need to be measured, cut and threaded on as a separate job. Also, no glue, tapes or messy powder and no sealing joints every two metres - saving you time.

Jointing Information

Pair Coil Copper Tube is recommended to be flare jointed.

Easy Transport and Storage

The 20 metre or 5 metre coils are supplied with pink plastic end caps in rugged cardboard boxes for protection and storage. Sizing info is prominently displayed on boxes.

Bending

If tight bending is required the insulation can be carefully cut back to fit the pipe bender and then replaced and glued or taped.

Pre Insulated Annealed Copper

ORDERING DETAILS

20m Length Pair Coil

Sizes Available/Dimensions		
Item #	Tube Size (inch/mm)	Roll Length
747111	1/4 - 3/8 / 6.35 - 9.52	20m
747112	1/4 - 1/2 / 6.35 - 12.70	20m
747113	1/4 - 5/8 / 6.35 - 15.88	20m
747114	3/8 - 5/8 / 9.52 - 15.88	20m
747115	3/8 - 3/4 / 9.52 - 19.05	20m

5m Length Pair Coil

Sizes Available/Dimensions		
Item #	Tube Size (inch/mm)	Roll Length
747511	1/4 - 3/8 / 6.35 - 9.52	5m
747512	1/4 - 1/2 / 6.35 - 12.70	5m
747513	1/4 - 5/8 / 6.35 - 15.88	5m
747514	3/8 - 5/8 / 9.52 - 15.88	5m

Insulation marked in one metre increments. Pipe insulation meets JISA9511

Safe Working Pressure (kPa)

Imperial (inch)	50°C	60°C
1/4"	9545	8235
3/8"	6103	5296
1/2"	4482	3899
5/8"	4516	4002
3/4"	4190	3306
