ventflo[®]

DUCTED CEILING EXHAUST FAN

200mm / 250mm

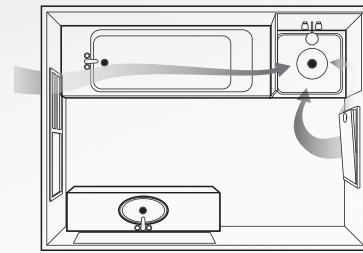

IXL[®]
since 1858

The Ducted Ventflo Ceiling Exhaust Fan is designed to fit a ceiling cavity with a minimum height of 210mm (for model 10334) and 242mm (for model 10337), and has a 125mm diameter (for model 10334) and 150mm diameter (for model 10337) duct outlet.

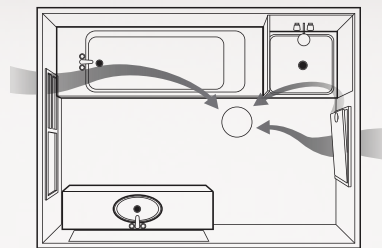

The Ducted Ventflo Fan works by drawing air from the room, and as with all exhaust fans, it is essential that sufficient air inlets exist through windows, vents or under doors.

The Ducted Ventflo must be installed in accordance with current wiring rules (AS/NZ3000) by a licensed and registered electrical contractor or similarly qualified person.

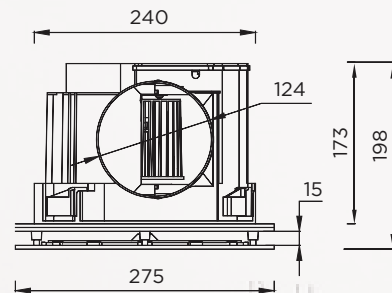

Ducting is not included in these models.
