

To whom it may concern,

Sub: Extended Product Warranty of 25 Years to JA Solar PV Modules

This is to confirm JA Solar offers additional thirteen (13) years on top of current twelve (12) years Limited Product Warranty to below specified PV modules. JA Solar warrants there will be free of defects in material, workmanship or manufacturing that materially impede the performance functioning of the Products conditionally within twenty-five (25) years warranty period starting from Warranty Commencement Date.

Product and System Specification:

Module Series: JAM54S30 series; JAM54S31 series

Distribution Channel: modules that are CEC listed and CER SPV system verified

PV Systems: Australian Residential Rooftop

This extended Limited Product Warranty applies to above PV modules that are installed on or from 12th August 2022.

Specified Site Condition:

Module installed under below conditions would void this additional thirteen (13) years warranty, that includes high temperature and high humidity regions with

- Monthly average temperature $>45^{\circ}\text{C}$ and monthly average humidity $>85\%$

Please consult JA Solar and seek for pre-approval if PV modules are to be installed less than 500m from seaside, otherwise it may void product warranty.

Please ensure modules are not installed on sites where are extremely cold or with heavy snow, strong wind or adjacent to island which is prone to have salt mist, or desert or other extreme environment specified in JA Solar standard Installation manual and JA Solar Limited Warranty.
