

590mm Metal Roof Mount for ISP (Internet) Satellite Dishes **13MM-SM20**

The SM20 is a 590mm high ISP satellite dish/antenna mount suitable for use on pitched or flat metal roofs or concrete pads. The mast allows common internet reception antennas to clip into the top of the mount or sleeve over as required and clamp into place. The SM20 is supplied with a clamping collar to lightly tighten the ISP antenna base to hold it securely in place. No modifications are required to the ISP dish leg.

Features and Benefits

- » Heavy-duty ISP antenna mount for metal roofs and concrete pads
- » Install on pitched or flat surfaces with telescoping support arms for ease of installation
- » 590mm mast height for a discrete installation
- » Made from high-quality galvabond steel
- » No modification is required to the ISP dish leg, so the manufacturer warranty is not voided
- » Proudly made in Australia

Starlink® unit and cable not included
