

SAFELINK

Smoke Alarm Wi-Fi Gateway

The **SafeLink** is a Wi-Fi gateway between the Emerald **EMS app** and your RF Emerald Smoke Alarms, which allows you to view the real-time status of your alarms via your smartphone.

Manage your alarms by using your smartphone to have instant control of false alarms, locate triggered alarms and test your alarms routinely to prevent your house from danger.

FEATURES

- Test and control your alarms at your finger-tips
- Alarm event history and testing results
- Humidity and temperature sensors
- Link emergency contacts
- Features specifically designed for users with accessibility needs
