

2m Mast Tripod Mount with Adjustable Stay Bars

55MM-SM30

The SM30 is a 2m fixed mast antenna mount suitable for TV, Radio, Cellular, and ISP antennas. It is designed for metal-clad roofs and features duo cleats for securely mounting the stay bars to the roof surface. Using a one-piece 2m x 42.4mm outer diameter mast, the SM30 is simple and easy to install. The ultra-heavy-duty design makes the SM30 the right choice for larger, heavier antennas where weight and wind loading apply*.

Features and Benefits

- » 2m metal roof mount suitable for ISP, Cellular, TV and Radio antennas
- » Heavy-duty 42.4mm mast outer diameter with 2.0mm wall
- » Telescoping support arms with duo cleat roof mount brackets for ease of installation
- » Suitable for cladding rib heights between 16mm and 30mm and rafter and batten spacing from 900-1200mm
- » High-quality Galvabond® steel
- » Proudly made in Australia

*The SM30 mount is designed for maximum wind speed of 75 m/s or N5, C3 Classification with maximum 0.16 m² antenna area.
