

A close-up, slightly angled view of a solar panel. The panel is dark grey or black with a grid of fine, light-colored lines representing the solar cells. The panel is framed by a dark border.

Energy for a better World

Solar Modules & Smart Energy

Commitment of AXITEC

AXITEC is the largest solar module brand in Europe. In addition, AXITEC also offers energy storages, hybrid inverters and charging stations. The engineering at the headquarters in Böblingen (Germany) supports the global production capacities of over 2 GWp solar modules. The core competence covers the complete process chain from development, manufacturing, quality control to sales and service of all products.

Solar Modules

The solar modules of the German brand AXITEC are distributed and installed worldwide. The power modules with half-cut technology have a lower cell resistance and thus a higher performance than standard modules.

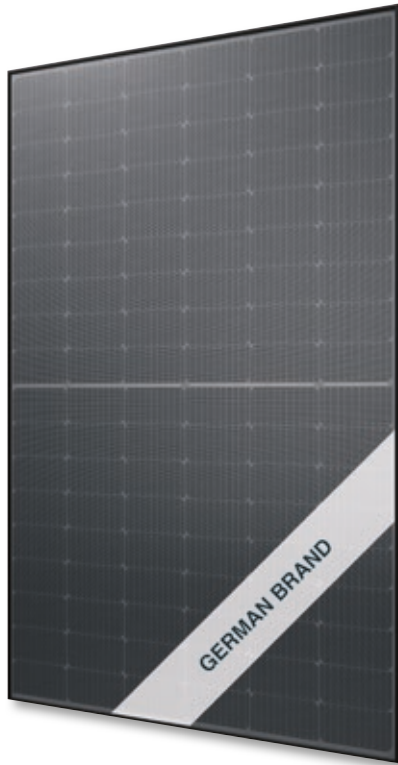

German-Australian-Engineering

AXIblackbiperfect GXXL
430 - 440 Wp

High performance bifacial solar module
108 halfcell, glass/glass, N-Type TOPCon

AXIbiperfect GXXL WB
430 - 440 Wp

High performance bifacial solar module
108 halfcell, glass/glass, N-Type TOPCon

AXIbiperfect GXXL TS
565 - 580 Wp

High performance bifacial solar module
144 halfcell, glass/glass, N-Type TOPCon

30 years Manufacturer's Product Warranty

30 years Performance guarantee

Up to 30 % more power output by Bifacial-Technology

More performance through innovative TOP N-Type TOPCon-Technology

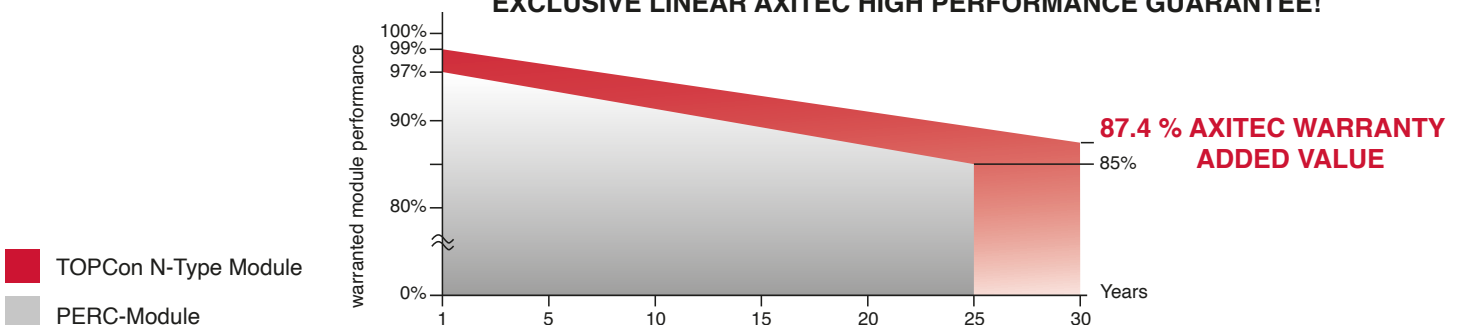

Increased safety through improved fire protection

Guaranteed positive power tolerance from 0-5 Wp by individual measurement

EXCLUSIVE LINEAR AXITEC HIGH PERFORMANCE GUARANTEE!

Smart Energy Products

As a perfect addition to the solar modules, AXITEC has advanced the development of storage systems and EV-chargers. AXITEC offers flexible, expandable high-performance Li-Ion storage systems for all applications - from home to business. The storage systems and the charging station perfectly combine performance, security and durability.

AXIstorage Li SV

The two AXIstorage Li SV storage systems are ideal partners for private homes and businesses. Due to the modular design, the storage capacity can be individually adjusted.

Thanks to the innovative high-voltage technology, both storages have a very high efficiency with the best price-performance ratio. The Li SV1 and Li SV2 are compatible with more than 100 inverters.
