

**We reinvented  
the wheel.**

**MOBIWAY BOOST**

# For 40 years the spool has remained unchanged... And so we **REINVENTED THE WHEEL.**

MOBIWAY BOOST comes with 1.5mm & 2.5mm 2core + earth flats and a robust new spool design to help you work smarter, faster, and safer.

MOBIWAY BOOST, a revolutionary cable spool management system that challenges a longstanding industry standard, addresses the inconveniences associated with traditional spools, offering seamless solutions. Designed with the user in mind, the inner drum within the cable spool ensures a safer unspooling and rewinding process, whereas its integrated handle provides convenient and ergonomic carrying, a feature which improves overall handling. MOBIWAY BOOST is an innovative spool system that revolutionizes cable installation, elevating efficiency and safety.

## **Makes sense, whichever way you stack it.**

MOBIWAY BOOST can also be stacked vertically and horizontally, which reduces labour costs, improves safety and efficiency by allowing quick setup, secure transport and storage with its rubber feet for additional stability, and simultaneous pulling of multiple cables. The all-in-one spool system is designed so as the incorporated rubber feet to prevent roll-offs during installation and ensure stability, improving storage efficiency and reducing the risk of spills or falls in vehicles. Engineered with durability in mind, MOBIWAY BOOST is the game-changer that provides a solid foundation for all your on-site requirements.

**Vertical Stacking**

**Horizontal Stacking**

**Step into a revolutionary era of cable management with MOBIWAY BOOST.**

## **Meeting the most demanding electrical installation needs.**

MOBIWAY BOOST integrated carry handle and wheel inside the spool system makes the transportation and rewinding or unspooling a breeze. For effortless transportation, MOBIWAY BOOST is equipped with a carry handle which provides a convenient and ergonomic carrying - a feature which improves overall handling whereas the integration of an inner drum within the cable spool ensures a safer unspooling and rewinding process. MOBIWAY BOOST re-imagines traditional cable management with its user-centric innovation, promoting workplace safety and fostering a more user-friendly and engaging work environment.

## **MOBIWAY BOOST: A win for efficiency and sustainability**

Designed with sustainability at its core, MOBIWAY BOOST is a game-changer. Its recyclable and reusable design not only minimizes waste, reducing landfill impact, but also decreases the need for raw material mining contributing to a more sustainable electrification. The spool has been eco-designed to reduce its environmental footprint because it can be respooled and reused multiple times.

In a move away from the unsustainable use of single-use spools, MOBIWAY BOOST – a returnable and reusable solution, leads to a significant decrease in energy consumption. With improved meter marking and additional cable length on each spool, it minimizes scrap cable and maximises usage value. Through the implementation of recyclable and reusable initiatives, we can significantly contribute to waste reduction in landfills and minimize the impact of mining, achieving energy savings. Upgrade to an easier, safer solution that will save you time and money, and reduce waste on every worksite.

  
The logo features a red stylized 'N' icon to the left of the text 'MOBIWAY™' in bold black uppercase letters, with 'BOOST' in red uppercase letters below it.

The innovative cable management system that allows cable unspooling, rewinding, stacking, and carrying with ease and efficiency.
