

# Telescoping Ceiling Bracket

The Caddy Telescopic Ceiling Fan Bracket is a revolutionary product that allows the electrician to quickly mount a ceiling fan between joists, without the laborious process of installing a timber. You can choose between mounting flush with the joists, or recessed in the ceiling by simply bending at the pre-notched fold points.

The telescoping design allows flexible mounting, especially between irregular joist spacings, and can be mounted to timber or steel frames. The brackets have pre-drilled holes to allow easy mounting of the fan or other electrical appliance with nothing but a screwdriver.

## SPECIFICATIONS:

- Material: Hot Dip Galvanized Steel
- Stud Spacing: 406-605mm
- Maximum load rating for fan: 15.9 Kg
- Maximum load rating for light or other fixed object: 23Kg
- Box QTY: 25 pcs

## APPLICATIONS

- Perfect for mounting ceiling fans
- Can be mounted flush or recessed
- Telescopic design allows irregular joist spacing to be overcome
- Easy-bend fittings allow custom mounting options
- Only needs screw-gun to install
