

Ecaset Weatherproof Sensor

The Ecaset IP66 weatherproof outdoor motion and daylight sensor is the perfect solution for outdoor security and energy-saving needs. Its 110-degree detection range and adjustable detection distance ensure that motion and light changes are detected, while the manual override function provides direct control when needed. With the added convenience of an infrared remote control, you can easily adjust settings without having to touch the installed sensor. Use it in alfresco areas, patios, driveways, parking lots, backyards, and other outdoor areas to enhance safety and save energy.

- Complies with AS/NZ 60669 compliant
- The sensor is designed for use outdoors, detecting motion and light levels to help save energy and enhance security
- Detection range of 110 degrees, making it ideal for covering a wide area
