SYSTEM OVERVIEW

Together with Visible and Thermal technology, this flame detection network camera provides an all-in-one solution for video surveillance. This camera has the ability to detect flame from long range, supports flame tracking and positioning, and provides intelligent visual and audible warning. A key of this camera featuring the ability to pair with the GT Isolator Relay to wirelessly connect via RF interconnection with GT High Performance Smoke Alarms - effectively creating the only Lithium Battery Fire Detection system designed to work with residential smoke alarms.

SCENE

This device is applicable to most places where both fire alarm and video surveillance are needed, such as:

- ✓ Residential homes, units and townhouses
- ✓ Unit complex common areas
- ✓ Garage and car park areas
- ✓ Anywhere Lithium battery charging takes place

FUNCTIONS

Uncooled VOx Technology

GT High Performance flame detection cameras use uncooled VOx sensor technology. The detector is small-sized, and highly sensitive allowing the camera to detect the flame on a monitored site.

Flame Detection

Integrating thermal and video surveillance, detect flame based on abnormal temperature and conform details through the camera.

Smart H.265+ & Smart H.264+

With advanced scene-adaptive rate control algorithm, GT smart encoding technology realizes the higher encoding efficiency than H.265 and H.264, provides high-quality video, and reduces the cost of storage and transmission.

Visible and Audible Alarm Notification

Supports the light alarm and voice alarm when flame is detected, to realize the deterrence and effective intervention. The camera is built in multiple voices for selection, and supports customized voice importing.

Flame Tracking

Identifying and positioning flame.

Remote Intercom

Built-in MIC and speaker enable remote intercom between software platform and App.

Alarm Output

Built-in alarm input and output port to realize linkage output.
